Profile

Senior AI & Full Stack Engineer specializing in MERN stack development, TypeScript, and AI/LLM integration. Experienced in engineering scalable SaaS platforms, high-performance web applications, RESTful APIs, and database-driven systems using React.js, Next.js, Node.js, and Python. Skilled in building RAG-based solutions using OpenAI Embeddings, MongoDB Atlas Vector Search, and Google Gemini, along with developing AI-powered applications, intelligent automation workflows, and enterprise-grade software solutions. Focused on delivering secure, maintainable, and scalable applications that solve real-world business challenges.

Education

Bachelor of Science in Computer Science (BSCS) 2014 – 2018
University of Central Punjab (UCP), Lahore, Pakistan
CGPA: 3.63 / 4.00

Intermediate in Computer Science (ICS) 2012 – 2014
Punjab College for Boys, Sialkot Road, Pasrur, Sialkot
Marks: 827 / 1100 — Grade A

Matriculation in Science 2010 – 2012
Govt. RM High School, Saukin Wind
Marks: 957 / 1100 — Grade A+

PROFESSIONAL EXPERIENCE

Over 7+ years of combined hands-on development experience across professional roles, project-based work, and academic projects.

Senior AI & Full Stack Engineer — 10Pearls | Lahore, Pakistan April 2026 – Present

- Developing AI-powered applications, SaaS platforms, and scalable full-stack web solutions.
- Building modern frontend interfaces using React.js and Next.js.
- Developing backend services, REST APIs, and scalable systems using Node.js, Python, FastAPI, and .NET.
- Working on AI/LLM integrations, AI agents, and business automation workflows using n8n.
- Designing secure APIs, clean architecture, and high-performance applications.
- Contributing to enterprise-grade web applications, admin dashboards, and business automation systems.

Full Stack Developer — BerryBoost | Lahore, Pakistan April 2022 – March 2026

- Developed full-stack web applications using the MERN stack and TypeScript.
- Built responsive and interactive frontend interfaces using React.js.
- Designed and developed REST APIs using Node.js and Express.js.
- Collaborated with team members to develop secure and scalable web solutions.
- Wrote clean, maintainable, and production-ready code.
- Used GitHub for version control and Postman for API testing.

Full Stack Developer — Thrive Grit | Lahore, Pakistan Project-Based December 2020 – March 2022

- Delivered 3 full-stack MERN applications from requirement gathering through production deployment.
- Built responsive and dynamic frontend interfaces using React.js.
- Developed scalable REST APIs using Node.js and Express.js.
- Managed MongoDB databases and collaborated with the team on testing and feature development.

MERN Stack Developer — Aspire Analytics| Lahore, Pakistan Internship July 2018 – November 2020

- Worked on full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Built dynamic and responsive frontend interfaces using React.js.
- Collaborated with cross-functional teams to design, develop, test, and deploy application features.

SCHOLARSHIPS & Awards

- **Government Scholarship** — Awarded during Matriculation.
- **Punjab College Scholarship** — Received two years of scholarship / free education during Intermediate.
- **UCP Academic Scholarship** — Awarded and maintained a 50% academic scholarship throughout all 8 semesters of BSCS.

TECHNICAL SKILLS

Frontend:	React.js, TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3, Framer Motion
Backend:	Node.js, Express.js, REST APIs, JWT Authentication, Google OAuth
Databases:	MongoDB, MySQL
AI & Automation:	n8n,RAG, OpenAI Embeddings, MongoDB Atlas Vector Search, Google Gemini, Python Selenium
Programming:	JavaScript, TypeScript, Python, C++, C#
Tools:	Git, GitHub, VS Code, Postman, Vercel, Netlify, Render

FINAL YEAR / RESEARCH PROJECT

CareerQuest — AI-Based Career Guidance Platform | University of Central Punjab July 2017 – July 2018 [Link]

- Developed an AI-powered career guidance platform providing personalized career recommendations and job matching within the IT sector.
- Implemented AI and NLP-based skill assessment, personality assessment, and career recommendation features.
- Developed full-stack application components, including user profiles, job-related data, and personalized dashboards.
- Led the project team and contributed to planning, development, integration, and implementation.

SELECTED PROJECTS

- **BB360 ERP** – Developed ERP modules for finance, inventory, purchase, sales, manufacturing, and HR using React, TypeScript, Node.js, Express.js, and MongoDB. [Live]
- **MediTour** – Developed a healthcare platform integrating patient, quotation, hospital, and doctor workflows using React, Node.js, Express.js, MongoDB, and TypeScript. [Live]
- **Trendora** – Developed a creator-brand marketplace with role-based dashboards, authentication, real-time communication, and payment workflows. [Live]
- **The Saffron Pantry** – Developed an e-commerce platform using React, TypeScript, Vite, and Tailwind CSS with product, cart, wishlist, and filtering features. [Live]
- **Assar Patches** – Built a responsive B2B website using Next.js, React, TypeScript, and Tailwind CSS. [Live]
- **Expense Tracker** – Built a MERN-based expense management application with authentication, group expenses, settlements, and balance management. [Live]
- **Thrive Grit** – Developed a responsive React-based business website with reusable UI components, structured service sections, SEO-focused pages, responsive layouts, and a conversion-focused user experience. [Live]
- **Document-Based AI Assistant — RAG Prototype**
  - Developed a prototype AI assistant that allows users to upload documents and interact with their content through conversational queries.
  - Generated document embeddings using OpenAI Embeddings.
  - Used MongoDB Atlas Vector Search for retrieving relevant document content.
  - Integrated Google Gemini to generate context-aware responses.

CERTIFICATIONS

- **AWS Academy Graduate** – AWS Academy Cloud Foundations — 20 hours | July 2024 [Link]
- **Accelerate Your Job Search with AI** — Google / Coursera | August 2025 [Link]
- **Process Data from Dirty to Clean** — Google / Coursera | August 2025 [Link]
- **Intellectual Property Law Specialization** — University of Pennsylvania / Coursera | July 2025 [Link]
